HELLO
I AM
ELENA ROSSI

With over fifteen years in specialty coffee, I've traveled to origin countries, built relationships with farming communities, and developed roasting profiles that honor the complexity of every harvest. Our collective was born from a simple belief: coffee is a craft, not a commodity.

VISION

Founded in 2018 in a small garage roastery, Artisan Coffee Collective began with a single drum roaster and a passion for exceptional coffee. Our founder, Elena Rossi, had spent years traveling through coffee-growing regions, learning from the farmers who dedicated their lives to cultivating the perfect cherry.

ABOUT THE BRAND

Today we partner with over forty family farms across Ethiopia, Colombia, Guatemala, and Indonesia. Every lot is cupped, scored, and profiled before we commit to purchase. Our roasting philosophy is guided by a deep respect for the raw material — we roast to reveal, never to mask.

Our team of six roasters, two green buyers, and a quality control lab work together to ensure that every bag we seal carries the full expression of its origin.
