Core Features

Everything you need to ship

A purpose-built toolkit for engineering teams who refuse to compromise on speed or quality.

Lightning Fast

Sub-50ms interactions. Every action feels instant, from creating issues to updating sprints.

Smart Workflows

Automated state transitions and custom workflows that adapt to how your team actually works.

Deep Integrations

Native connections to GitHub, GitLab, Slack, and Figma. Your tools, unified.

Goal Tracking

Set objectives, link them to projects, and watch progress flow up automatically.

Why Streamline

Built for teams who ship

Keyboard-first design

Navigate your entire workflow without touching the mouse. Every action has a shortcut.

Real-time collaboration

See changes as they happen. No refresh needed, no merge conflicts on status updates.

Enterprise-grade security

SOC 2 Type II certified. SSO, SCIM, and audit logs included on every plan.

"Streamline replaced three tools for us. Issue tracking, sprint planning, and roadmapping — all in one place."

— Vercel Engineering

"We shipped 40% more features in Q3 after switching. The speed difference is not subtle."

— Stripe Platform Team

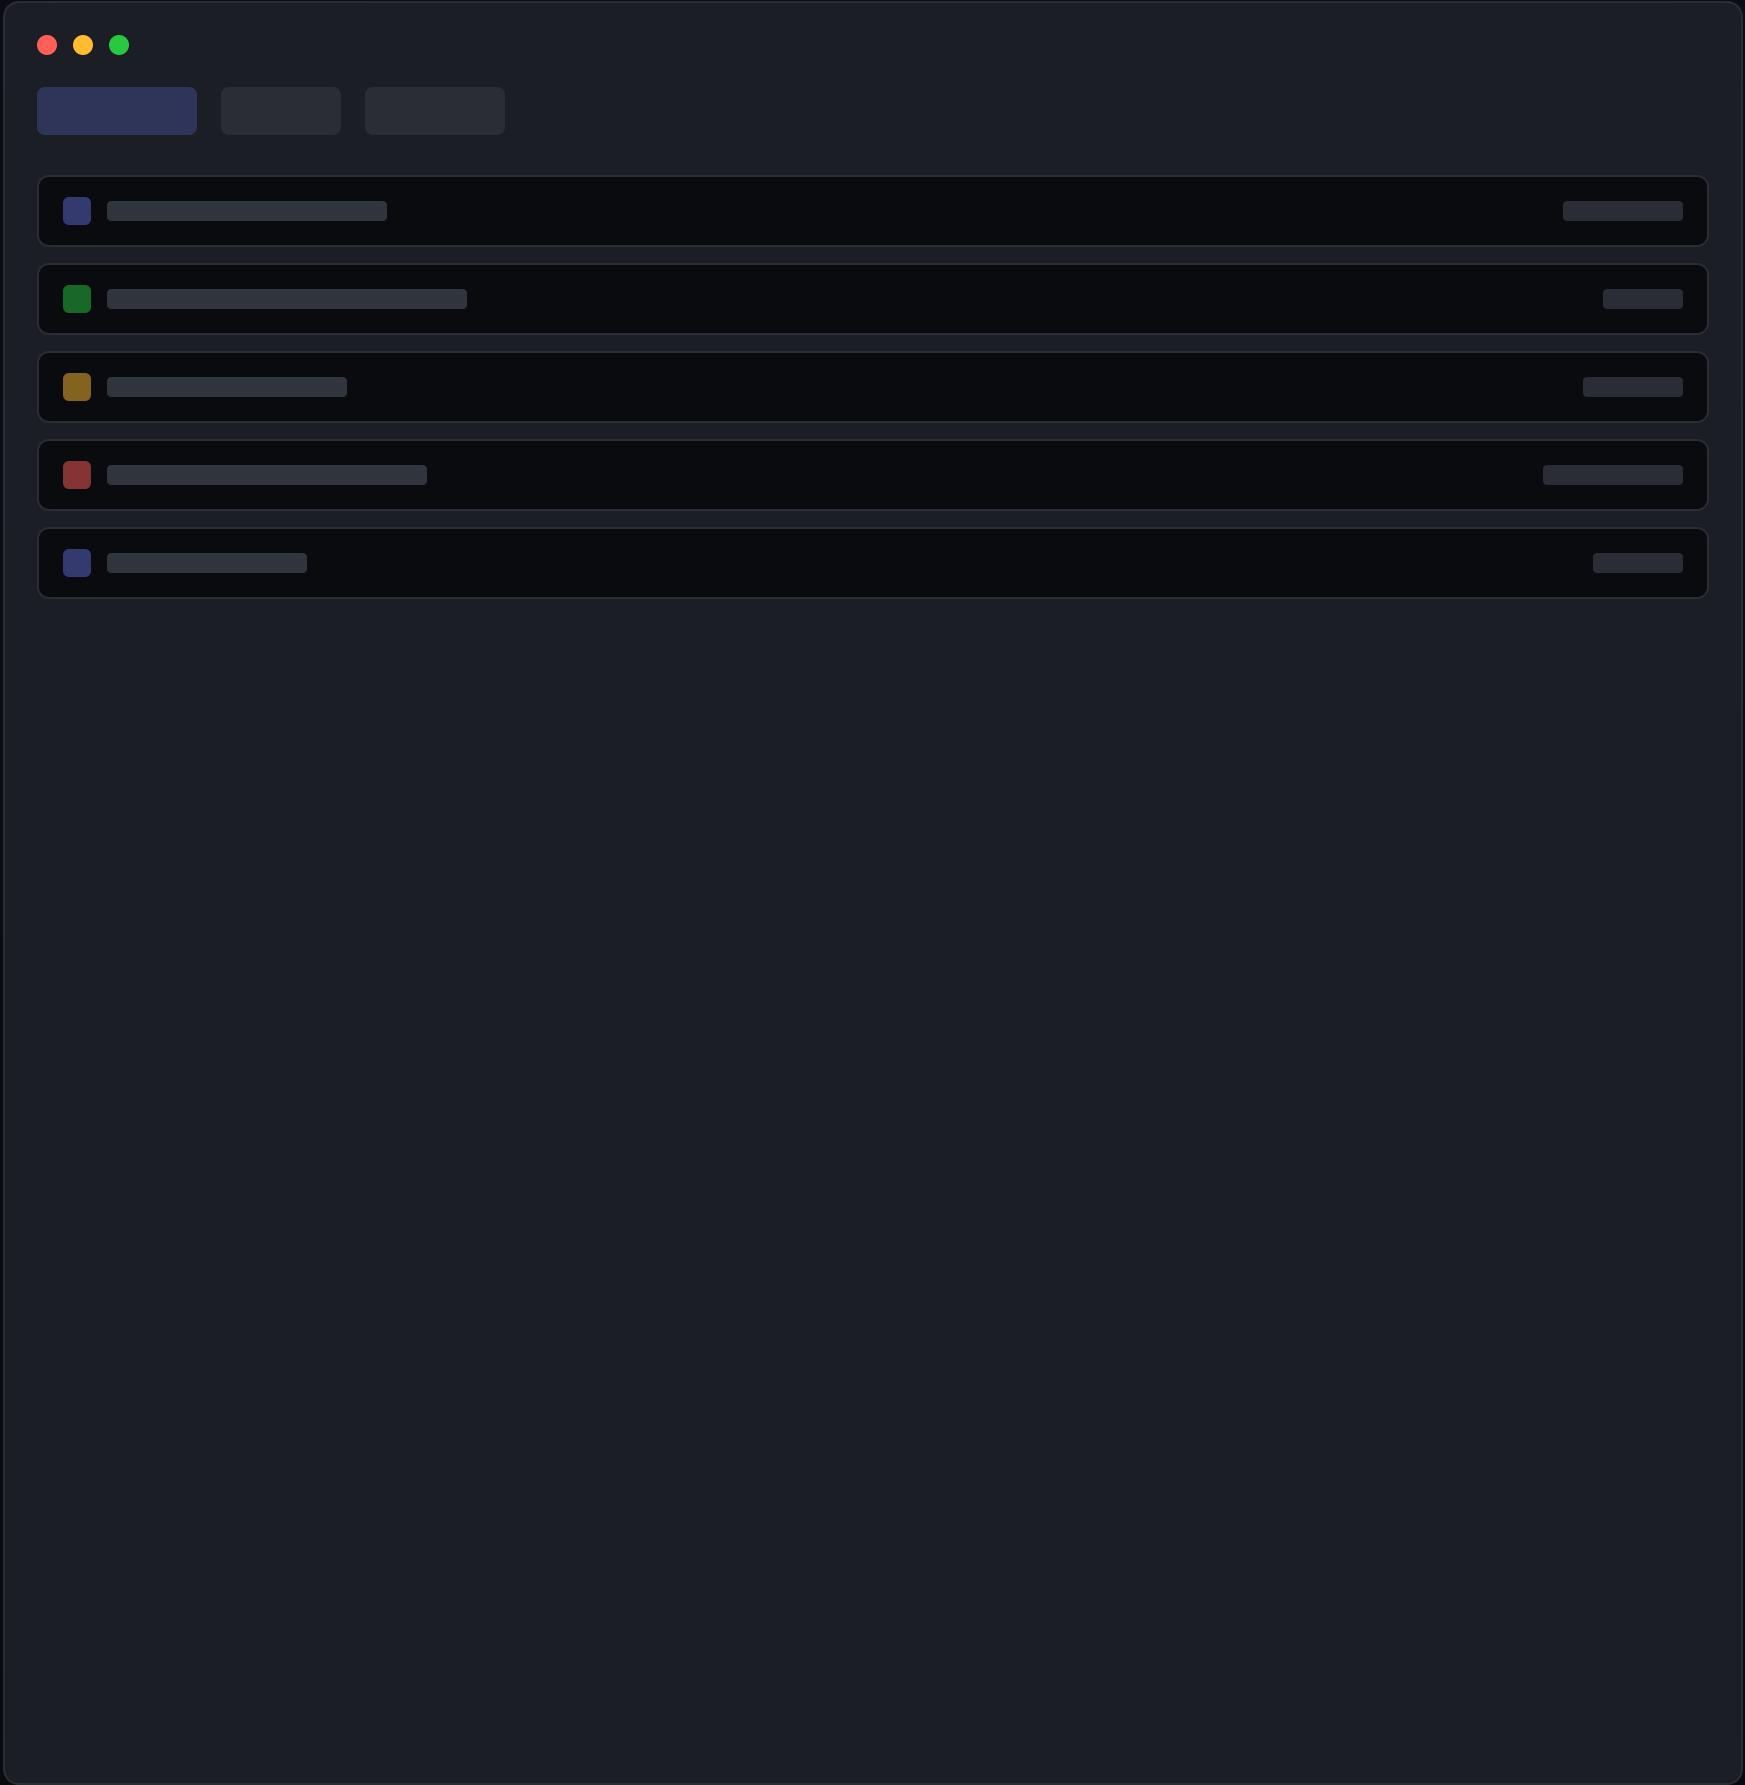

Issue Tracking

Track every issue with clarity

Create, assign, and prioritize issues in seconds. Smart filters and custom views let you see exactly what matters — nothing more, nothing less.
